SUMMARY

Product-minded Full-Stack Developer (2+ years) skilled in **MERN, real-time apps, and voice/STT/TTS integrations.**
I build **market-ready MVPs** that turn ideas into polished, revenue-ready products … fast. My edge lies in merging **growth thinking** with solid engineering, from MVPs to production-scale systems.

Recently, I've been exploring **RVC models**, and **AI-driven automation** —bringing natural communication and real-time collaboration into modern web apps.

CORE STRENGTHS

Frontend: React · Next.js · Angular · Vue · TypeScript · Tailwind · Responsive UI/UX
Backend: Node.js · Express.js · MongoDB · MySQL · Firebase · Firestore · REST APIs
Voice / AI Integration: Streamlit,Dash,LiveKit (WebRTC) · STT (Whisper, Google Cloud, AssemblyAI) · TTS (ElevenLabs, AWS Polly) · RVC voice model fine-tuning .
Automation / Tools: n8n · Zapier · WebSocket / Realtime APIs
DevOps & Delivery: Azure DevOps · CI/CD · Docker · Vercel · Netlify · Git/GitHub
Other: JWT / OAuth · Scalable DB design · Cloud functions · API security

---

SELECT EXPERIENCE

Qaribly — Marketplace MVP (End-to-End Product)

Product & Full-Stack Lead

- Built complete MVP for a Pakistan-focused marketplace — **React/Next.js frontend**, **Node/Express backend**, and **MongoDB database.**

- Implemented authentication (JWT, OAuth), realtime updates, and user dashboards.
- Led product UX, integration, and early go-to-market planning.
- Delivered a polished MVP ready for early adopters and payment onboarding.

AI Fitness Coach Prototype — Voice-Enabled App

Personal R&D Project

- Designed a prototype that gave voice-based coaching via **RVC-tuned voices**, **Speech-to-Text**, and **Text-to-Speech** APIs.
- Built backend in Node.js with real-time interaction flow and Firebase for user session data.
- Added voice response pipeline and user-triggered actions through STT events.
- Showcased ability to merge some ML/AI tools with frontend experience and real-time UX.

Freelance Product Developer (Multiple Clients / Internal Tools)

Ongoing (Remote)

- Built and deployed **customer-ready MVPs** for startups — task apps, browser blockers, dashboards, and automation tools.
- Integrated **n8n** automations to cut manual work and sync data across CRMs and Sheets.
- Managed CI/CD pipelines with Azure DevOps, improving delivery speed and reliability.
- Regularly collaborated with small teams to align product design with measurable outcomes.

PROJECT HIGHLIGHTS

.

- **Realtime Chat / Call System:** Developed WebRTC + Socket-based chat with presence tracking and session recording prototype.

- **Automation Suite:** Built workflow triggers using n8n and APIs (Sheets, Notion, Gmail, Calendars).
- **SmartTask** : Built a secure MERN task app with JWT auth, CRUD features, and responsive UI using Tailwind & Redux.
- **Twilio Voice Assistant (Prototype):** Developed a lightweight voice-enabled onboarding assistant using Twilio Programmable Voice and Google Speech-to-Text

---

EDUCATION

Bachelor’s in Computer Science — (University Of Central Punjab), (2025)
